Universal Access in the Information Society (UAIS)

Editors-in-Chief: **Constantine Stephanidis** and **Margherita Antona**

UAIS addresses the accessibility, usability, and, ultimately, acceptability of Information Society Technologies by anyone, anywhere, at anytime, and through any media and device.

UAIS focuses on theoretical, methodological, and empirical research, of both a technological and non-technological nature, that addresses equitable access and active participation of potentially all citizens in the information society. It features papers that report on theories, methods, tools, empirical results, reviews, case studies, and best-practice examples.

UAIS stimulates cross-fertilization between different contributing disciplines.

Why Publish in UAIS?

- Addresses the accessibility, usability, and, ultimately, acceptability of Information Society Technology by anyone, anywhere, at anytime, and through any media and device
- Technological and non-technological research focus
